I am a frontend developer and QA tester with experience in creating web and mobile applications. I specialize in developing interactive user interfaces and automating tests to ensure software quality. I enjoy solving problems, optimizing application performance, and working in agile environments as part of a team.

Work Experience

Innovatica S.R.L. (Full Time) — September, 2023 – March 2024

- Developed user interfaces with React.js and React Native.
- Optimized application performance
- Integrated APIs to handle real-time data.
- Designed and executed functional and automated tests with Selenium and Postman.
- Identified and reported bugs using Jira
- Using Selenium and Postman for automated testing.

Free Lance (Part Time) — March, 2024 – Present

- Developed web and mobile applications.
- Tested and optimized code to improve performance and usability.
- Integrated APIs and developed custom functionalities.
- Ensured software quality through automated and manual testing.
