Professional Summary

I am a Front-End Developer and QA Support professional with experience in building web and mobile applications. I specialize in developing interactive user interfaces and automating tests to ensure software quality. I enjoy problem-solving, optimizing application performance, and working in agile team environments.

Technical Skills

Languages and Technologies:

- **JavaScript:** Dynamic user interface development, state management, and performance optimization.
- **React.js:** Development of interactive web applications, routing, state management, and performance optimization.
- **React Native:** Development of hybrid mobile applications, API integration, and optimization for iOS and Android platforms.
- **Fetch API:** Consumption of RESTful services, handling asynchronous responses, and error management in communication between frontend and backend.
- **SQL:** Database design and management, complex SQL queries for data manipulation.
- **Python:** Scripts for automation and backend tasks, API integration, and unit testing.

Tools:

- **Selenium:** Implementation of automated tests for web and mobile applications, creating scripts for UI tests and functionality validation.
- **Postman:** Creation and execution of API test, validation of responses, and error handling in integration.
- **Jira:** Agile project management, task assignment, bug tracking, and report generation.
- **Git:** Version control, branch management, and conflict resolution in collaborative teams.
- **Android Studio:** Development of mobile applications for android, SDK managements, performance, optimization, and testing.
- **Linux:** Working in Linux-based environments.

Testing and QA:

- **Automation with Selenium:** Creation of automated tests to validate application behavior, including functional, performance, and security tests.
- **Manual and Functional Testing:** Conducting exploratory and user acceptance tests to ensure features align with requirements.
- **Bug Detection and Documentation:** Detailed error logging, root cause analysis, and collaboration with developers to resolve issues.

Soft Skills

- Teamwork and collaboration
- Analytical thinking
- Adaptability to new technologies
- Attention to detail
- Effective communication
- Project planning and management

Work Experience

Freelance - Web & Mobile Developer (Part-time)

Asunción, Paraguay | April 2024 - Present
- Development of web and mobile applications
- Code testing and optimization to improve performance and usability
- API integration and custom feature development
- Automated and manual testing to ensure quality

Innovatica S.R.L. - Front-End Developer & QA (Full-time)

Asunción, Paraguay | September 2023 - April 2024
- Interactive interfaces with React.js and React Native
- Application performance optimization
- API integration for real-time data management
- Design and execution of functional and automated tests
- Bug reporting with Jira and use of Postman and Selenium

Altas Tecnologías S.A – IT Support (Full-time)

Asunción, Paraguay | July 2022 – January 2023
- Diagnosis and troubleshooting of technical issues
- Diagnosis and troubleshooting of technical issues
- Network maintenance

Education

- Computer Engineering - Universidad Americana (In progress)
- Introduction to Python – Open Bootcamp (Completed)
- Introduction to Web Development – Open Bootcamp (Completed)
- Advanced C++ Programming – SNPPP (Completed)

Languages

- **Spanish:** Native Level
- **English:** B1 Level
